5th Asia Pacific Conference in Quantum Information Science

The First Announcement

The goal of the Asia-Pacific Conference on Quantum Information Science is to promote and strengthen the interactions and exchange of knowledge among researchers of the Asia-Pacific region in the rapidly advancing field of quantum information science. Many leading researchers will present their latest experimental and theoretical findings in this fascinating area. We hope the conference will develop into a series which will truly reflect a cooperative effort on quantum information science for the Asia-Pacific region, and will become a regular event to be held and hosted at different locations in the region.
